

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

# INDEX TO VOLUME IV.

\*\*\* Names of contributors are printed in small capitals.

- Abbe, C., on atmospheric electricity and earth-currents, 314.
- Abbott, C. C. Color-sense in fishes, *ill.* 336; hibernation of the lower vertebrates, *ill.* 36.
- Abbott, C. C., on hermit toad, 72; Naturalist's rambles about home, reviewed, 380; *Scaphiopus solitarius*, 262.
- Abbott, Edward. Swarming insects, *ill.* 79.
- Aboriginal American languages, 522.
- Academic distinctions to Americans, 47, 78.
- Acadian basin in American geology, 258.
- Acids, complex inorganic, 254.
- Adams, F., on apatitbringer in Canada, 258.
- Adams, J. C., on moon's latitude, 294; Newton's theory of atmospheric refraction, 295; obliquity of ecliptic, 295.
- Adirondacks, mammals of, 445.
- Aeronautics, discovery in, 464.
- Afghanistan, oil-bearing strata in, 266.
- Africa, archeology of, 438; expedition to, 449; languages of, 310.
- African race in United States, 222.
- Agassiz, Alexander. Phosphorescence in the deep sea, 270.
- Agassiz association, 487.
- Agricultural chemists, association of, 312; convention of, 30; experiment-stations, scope of, 508; work of, 333; station, New-York, 519; statistics, 575.
- Ainos, graves of, 503.
- Air, navigation of, *ill.* 531; velocity of, 253.
- Alabama, cretaceous phosphates in, 78; weather-signals, 464.
- Alaska coast-pilot, *ill.* 561; new river in, 539.
- Albatross, winter expedition of, 481.
- Alcohols, production of, 30.
- Alden, G. I., on training for mechanical engineers, 323.
- Algerian coal, 267.
- Algave and Bouldard's Electric light, reviewed, 463.
- Algonquin legends, 499.
- Allen, A. H., on valence, 321.
- Allen, J. A., on faunal areas, 375.
- Almanacs, history of, *ill.* 492.
- Almucantar, 293.
- Alps, flora of, 475.
- Altitudes, dictionary of, 481.
- Aluminium, soldering, 332.
- Amazon, pororóco of, *ill.* 488.
- America, geological maps of, 382; psychological research in, 359, 369.
- American anthropology, aspects of, 217; problems of, 545; appliances for deep-sea investigation, *ill.* 146, 224, 400; association for the advancement of science, endowment of research by, 221; meeting of, 1886, in London, 298; meeting of, in Philadelphia, 2, 189, 192, 229; addresses to, 229; botanical club of, 358; chemical section, 76, 107; circular, 107; committee reports of, 357; delegates from foreign societies to, 140; economic science and statistics section, 121; eminent visitors to, 139; mechanical science section, 187; reports of proceedings of, 291, 320, 339; success of, 269; members of, 141; officers of, for 1885, 298; organization of, 221; coaster's nautical almanac for 1884, reviewed, 20; contributions to memorials of European scientific men, 483; explorations, 110; geological railway-guide, 396; historical association, 75, 301, 312; initiative in methods of deep-sea dredging, 54; institutions, history of, 173; languages, 522; classification of, 317; natural history, 536; naturalist, rambles of an, 380; oriental society, 443; ornithologists' union, 374; pearls, 368, 470; permanent railway, 288; public health association, 440; science, discrediting, 303; scientific work, credit to, 301; society of civil engineers, meeting of, at Buffalo, 11; students, interests of, 141; tribes, 396.
- Americans, foreign academic distinctions to, 78.
- Amla, serrated appendages of throat of, 511.
- Amphibian brain, 340, 343.
- Anaesthetic, new, 468; new administration of, 411.
- Andesite from New Bogosloff volcano, 524.
- Andree's Metallurgy of primitive nations, reviewed, 21.
- ANDREWS, Horace. The prime meridian, 368.
- Animal intelligence, 16.
- Animals, marine, recognition of time by, 429; mental evolution in, 16.
- Annelid jaws, fossil, 263.
- Anthrax virus, virulence of cultivated, 276.
- Anthropological discoveries in Canada, 318; section of British association, 46.
- Anthropology, American, 545; aspects of, 217.
- Antiquities from Cyprus, 364.
- Apatitbringer in Canada, 258.
- Apes, anthropoid, 339.
- Apprenticeship question, 347.
- Archean rocks, 259.
- Archeology, African, 438; prehistoric, 469.
- Archibald, D., on Krakatoa committee, 253; on velocity of air, 253.
- Arctic expeditions, 409; exploration, 77, 93; literature, 366.
- Arizona, topographical maps of, 188.
- ARMSBY, H. P. Special manures for particular crops, 57.
- Art in shell, 26.
- Artesian borings, 268.
- Arthur, J. C., on nature of gumming, 359.
- Asiatic exploration, 323.
- Asserson, P. C., on Tereido navalis, 12.
- Association of official agricultural chemists of the United States, 312.
- Associations, comparative study of British and American, 271.
- Asteroid, new, 382; ring, 292.
- Astronomy, pending problems in, 192.
- Atkinson, E., on rate of wages, 283.
- Atlantic currents, 561; Ocean, level of, 326.
- Atmosphere, obscurity of, 94.
- Atmospheric electricity, 164.
- Atomic weights, 523.
- Atwater, W. O., on assimilation of nitrogen by plants, 322; chemistry of fish, 321; nutrients in foods, 347.
- Auchincloss, W. S., on balancing-machine, 293.
- Auroras, artificial, 465.
- Australasian association for the advancement of science, 522.
- Authorship, recognition of, in publications of signal-service, 467.
- Automatic sprinkler system, 291.
- Axes, 344.
- BABBITT, Franc E. North-eastern and north-western Indian implements, 33; some implements of the Minnesota Ojibwas, *ill.* 527.
- Babirusa tusks from Indian grave, 34.
- Bacterium, comma-shaped, 92.
- Bad seeing, 94.
- Bailey, on Acadian basin in American geology, 258.
- Baird, S. F., bibliography of, 45.
- Baker, B., on Forth Bridge, 287.
- Balancing-machine, 293.
- BALDWIN, Henry. Abnormal form of *Trillium grandiflorum*, 352.
- Baldwin's Orchids of New England, reviewed, 498.
- Balloon ascensions, *map*, 299.
- Baltimore, map of vicinity of, 518.
- Barnes, C. R., on fibro-vascular bundles in *Pinus sylvestris*, 358.
- Barnett, J. D., on anthracite-burning locomotive, 290.
- Barrande, memorial tablet to, *ill.* 139.
- Bartlett, J. H., on steam-heating, 290.
- Bassalian fauna, 223.
- Bassnett's True theory of the sun, reviewed, 478.
- BATCHELDER, J. M. The lamprey as a builder, 469.
- Bate, C. S., on distribution of Crustacea, 260.
- Beal, W. J., on torsion of leaves, 340.
- Beatrice, 341.
- Bell, A. G., on deaf-mutes, 346; possible method of communication between ships at sea, 296.
- BELL, A. Melville. Book-postage in the United States, 351.
- BELL, Louis. Temperature of the spheroidal state, 5.
- BENNETT, W. Z. A wider use for scientific libraries, 368.
- Bentham, George, *portrait*, 352.
- Bergen's Development theory, reviewed, 311.
- Bering Sea, new volcano of, *map*, 432.
- Berlin academy of sciences, 465.
- Bessey, C. E., on *Desmodium sessilifolium*, 358.
- Beyer, H. G., on Lingula, 343; oxygenated and unoxxygenated blood, 339.
- Bianchi, unfavorable reports from, 366.
- Bibliographical work in scientific fields, 31.
- Bibliography of meteorology, 449; of physical and historical writings, 450.
- Biological problems, 339.
- Bird's Higher education in Germany and England, 502.
- Bird-collection of U. S. national museum, 496.
- Birds, coming of, 571; migration of, 374; nomenclature of, 265; North-American, 86.
- Bismarck family, 425.
- BLAKE, W. P. The Carson-City ichnolites, *ill.* 273.
- BLANFORD, W. T. The correlation of geological formations, 208.
- Blood, oxygenated and unoxxygenated, 339.
- Blooming-time for flowers, 573.
- Bogosloff volcano, 138; andesite from, 524.
- Bolton, H. C. See Julien, A., and Bolton, H. C.
- Book notices, minor, 311, 463, 520.
- Borneo, natives of, 332.
- BORUM, C. The zero meridian of longitude, 32.
- Botanical club of American association, 358.
- Botanists, value of time of, 301.
- Bot-flies in a turtle, 511.

- Bottomly, J. T., on loss of heat by radiation, 250.  
 Boulard. See Alglave and Boulard.  
 Bourdillon's Report of the census of Bengal, 1881, reviewed, 557.  
 Bourne, S., on interdependence of portions of British empire, 286.  
 BRAMWELL, Sir F. J. On the relation of mechanical science to other sciences, 215.  
 BRANNER, J. C. The pororóca, or bore, of the Amazon, *ill.* 488.  
 Brashear, J. A., on production of optical surfaces, 323.  
 Brass-plating, 465.  
 Brazilian port, 268.  
 Brewster, W., on ptarmigan, 375.  
 BRINTON, D. G. Indian languages in South America, 159.  
 Brinton, D. G., on aboriginal American languages, 522; North-African archeology, 438.  
 British association for the advancement of science, distinctive features of, 203; honorary membership of, 155; meeting of, at Montreal, addresses at, 203; anthropological section, 46; appropriations by, 263; aspects of, 157; delegates to, 188; effect of, on Canadian science, 221; eminent men at, 139, 186; geological section, 73; Lord Rayleigh's address before, 179; prominent mathematicians at, 121; report of proceedings of, 248, 279, 316; visit of, to America, 160; Empire, interdependence of portions of, 286; in North America and Australia, 285; statistics of, 214.  
 Britton, N. L., on New-Jersey flora, 358.  
 Brook, G., jun., on teleostean eggs, 340.  
 BROOKS, W. K. A new law of organic evolution, 532; the recognition, by marine animals, of the hour of the day, 429.  
 BUCHANAN, A. H. Time without instruments, *ill.* 51.  
 Buckland's Record of Ellen Watson, reviewed, 380.  
 Building-stone collection of U. S. national museum, 505.  
 Bureau of physical standards, 314; of scientific information, 108.  
 BURGESS, Edward. A wider use of scientific libraries, 396.  
 Burton's A B C of modern photography, reviewed, 464.  
 Business depression, cause of, 348.  
 Butterflies' wings, preparation of, for albums, 26.  
 Butter-making, scientific, 407.  
 C., H. S. Wiedemann's Electricity, reviewed, 87.  
 Calendar, floral, 574; Science, 1885, 584.  
 Caloric power of sun's rays, 30.  
 Camera, vertical, in photography, 5.  
 Canada, anthropological discoveries in, 318; earthquakes in, 569; geological and natural-history survey of, 362; light-house system, 290.  
 Canadian finances, 285; Pacific railway, 289; science, stimulus to, 221.  
 Canal, Corinth, 268; routes between Atlantic and Pacific, *map*, 434.  
 Cañons, formation of, 99.  
 Carbon filaments, elasticity of, 410.  
 Carbonic acid, solid, density of, 322.  
 CARHART, H. S. Edison's three-wire system of distribution, 524.  
 CARPENTER, P. H. The bassalian fauna; *Pentacrinus asteriscus*, 223; the initiation of deep-sea dredging, 222.  
 CARPENTER, W. Lant. Education at the international health exhibition, 353.  
 Carpenter, W. L., and Stewart, B., on connection of sun-spots with terrestrial phenomena, 253.  
 Carpmæl, on new induction inclinometer, 253.  
 Carr's Mounds of the Mississippi valley, reviewed, 151.  
 Carson-City ichnolites, *ill.* 273.  
 Casey's revision of the Stenini, 561.  
 Caste in India in 1881, 557.  
 Catagenesis, 240.  
 Caucasian petroleum, 365.  
 Census of Bengal, 1881, report of, reviewed, 557; of India, 280; report of United States, 1880, reviewed, 119; seventh volume of, reviewed, 421; eighth volume of, reviewed, 461.  
 Cerebellum, 341.  
 Chadwick, E., on preparation for cholera, 299.  
 Challenger, exploring voyage of, reviewed, *ill.* 116, 176.  
 Chamberlin, T. C., on glacier, 154.  
 Chandler, S. C., jun., on almucantar, 293; colors of variable stars, 293.  
 Channing, E., on settlers of North-American colonies, 313; town and county government, 329.  
 Chaumont, de, on cholera disinfectants, 299.  
 Cheepach, 448.  
 Chemical affinity, 234; analyses, 500; changes in relation to micro-organisms, 257; elements, report to American association of committee on indexes of literature of, 320; section of American association, 76, 107; text-books, 500.  
 Chemistry, elements of, 500; of fish, 321; importance of, in biology and medicine, 454; inorganic, 500; lessons in, 500; progress of, since 1848, 206; of roller-milling, 320.  
 Chemists, association of, 312.  
 Chemung group, 327.  
 Chesapeake zoölogical laboratory, 122, 423.  
 Chester, F. D., on Delaware geological survey, 325.  
 Chickering, J. W., jun., and Gordon, J. C., on deaf-mute instruction, 347.  
 Child-life among the Omahas, 343.  
 Chile, aborigines of, 423.  
 Chippewa Indians, bird nomenclature of, 265.  
 Chlamydoselachus, 340.  
 Chlorine gas, solubility of, 256.  
 Cholera, 144; bacillus, 554; disinfectants, 299; preparation for, 299.  
 Christie, on the Greenwich observatory, 61.  
 Christmas greeting, 563.  
 Chronological cycles, 1885, 577.  
 Chronology of Japan, 508.  
 Clark, E. W., on exploration of the Kowak River, *ill.* 551.  
 Clark's Indian sign-language, reviewed, 556.  
 Clarke, F. W., on valence, 321; Elements of chemistry, reviewed, 500.  
 CLAYPOLE, E. W. Fish-remains in the North-American Silurian rocks, 34; fish-remains in North-American rocks, 270.  
 Claypole, E. W., on fish-remains in Silurian rocks, 326; section across Pennsylvania, 258; transition of beds, 327.  
 Climates of two hemispheres, 282.  
 Clocks of precision, 121.  
 Clock-time and sun-time, *ill.* 578.  
 Coal in Algeria, 267; German, 300.  
 Coal-field, Langrin, 504; Pennsylvania, 522; measures of Kentucky, 325; mine, photographs of interior of, 223.  
 Coast-pilot of Alaska, *ill.* 561; signals, improvements in, 290.  
 Cold-wave flags, 382, 559.  
 Collections, care of, in museums, 539.  
 College mathematics, 230.  
 Collier's Sorghum, reviewed, 479.  
 Collimator, new, 74.  
 Colonies, American, government of, 329; settlers of, 313.  
 Colony, oldest, in America, 283.  
 Color of the eye, change in, 452, 511.  
 Colorado, rocks of, 521.  
 Colors of stars, 291; of variable stars, 293.  
 Color-sense in fishes, *ill.* 336.  
 Combustion of mixtures of carbon monoxide, hydrogen and oxygen, 254.  
 Comet, new, 92; new periodical, 381; Wolf, 332.  
 Comma, use of, in scientific writing, 1.  
 Commercial relations of United States, 348.  
 Communication between ships at sea, 296.  
 Compass, magnetic, 250.  
 Congress as affecting scientific interests, 507; laws of, nullified by executive departments, 302.  
 Conocephalus dissimilis, 448.  
 Conocoryphean, primitive, 301.  
 Contributors, word to, 270.  
 Cook, A. J. Ergot nectar, 512.  
 Cook, G. H., on geological survey of New Jersey, 326.  
 Cooke's Bird nomenclature of the Chippewa Indians, 265.  
 Co-operation an element in development of science, 411; in scientific work, 125.  
 CORE, E. D. Catagenesis, or creation by retrograde metamorphosis of energy, 240.  
 Cope, E. D., on affinities of saurians, 340; phylogeny of Mammalia, 339.  
 Cornell university summer school of entomology, 111.  
 Correlation of geological formations, 208.  
 Corthell, E. L., on South Pass jetties, 13.  
 Cotterill's Applied mechanics, reviewed, 406.  
 Coues's Key to North-American birds, reviewed, 86.  
 Crabs, strength of muscles of, *ill.* 521.  
 Craigie, P. G., on supply of meat, 286.  
 Crane, T. M., on mediæval history, 313.  
 Credit of United States, 347.  
 Creek Indians, migration legend of, 499.  
 Cretaceous phosphates in Alabama, 78.  
 Crichton-Browne, on over-pressure in schools, 497.  
 Croes, J. J. R., on water-rates, 13.  
 Crystalline rocks, 327; of north-west, 238; schists, 327; specimens illustrating origin of, 511.  
 Crystallization, effect of, on sediment, *ill.* 484.  
 Culture periods, 345.  
 Cuneiform inscriptions, 443.  
 Currents, Atlantic, 561; North-Atlantic, *ill.* 415.  
 Curtis, J. S., on Ruby-hill mines, 459.  
 Curtis's Effect of wind-currents on rainfall, 409.  
 Cushing, F. H., on art among the Zuñis, 319.  
 Cus's Languages of Africa, reviewed, 310.  
 Cyclone, use of word, 468.  
 Cyclones, 381; study of, 363.  
 Cyprus, antiquities from, 364.  
 Cystophora cristata, hood of, *ill.* 514.  
 DALL, W. H. Classification of the Mollusca, 143, 351; a Mussulman propaganda, 457; a remarkable new type of mollusks, 50.  
 Dall, W. H., on glaciers, 154; labrets, 345.  
 Dallinger, on chemical changes in relation to micro-organisms, 257.  
 DANA, C. L. A scientific study of lawn-tennis, 473.  
 Dana, J. D., on synclinal in Taconic range, 259.  
 Danish international polar station, *ill.* 476.  
 Davis, on Conocephalus dissimilis, 448.  
 DAVIS, W. M. Drumlins, *ill.* 418; light in the deep sea, 94; temperature and its changes in the United States, *ill.* 569; tornadoes, and how to escape them, *ill.* 572.  
 Davis, W. M., on geographical classification, 328.  
 Dawkins, W. Boyd, on connection of North America with Greenland, 283; range of Eskimo, 316.  
 Dawson. See Tolmie and Dawson.  
 Deaf-mute instruction, 347.  
 Deaf-mutes, race of, 346.  
 Death, 342, 398.  
 Deaths, recent, 76, 123, 331, 409, 503.  
 Debts of nations, 285.  
 Deep-sea dredging, initiation of, 222; methods of, 54; investigation, appliances for, *ill.* 146, 224, 400; life, physiology of, 209; light in, 8, 94; phosphorescence in, 270.  
 Deflection of streams, 28.  
 Delaware estuary, 329, 368; geological survey, 325.

- De Morgan memorial medal, 123.  
Desmodium sessilifolium, 358.  
Development theory, 311.  
Dewar, J., on chemical changes in relation to micro-organisms, 257; constitution of elements, 225; density of solid carbonic acid, 322; radiation, 250; storage-batteries, 392; valence, 321. See also Living and Dewar.  
Diller, J. S., on Krakatoa dust, 71; Oregon rocks, 71; Unalaska sands, 44; volcanic sand, 154.  
Dinosaurian reptiles, 261.  
Disinfection by gas, 503.  
Dissociation, 256.  
Distribution of Crustacea, 260; three-wire system of, *ill.* 477, 524.  
Dixon, H. B., on incomplete combustion of mixtures of carbon monoxide, hydrogen and oxygen, 254.  
Dobell, on destruction of germs, 299.  
Dobson, G. E., on the geographical distribution of animals, 261.  
Douglass, A. E., on Florida mounds, 344.  
Douglass, J., on coast-signals, 290.  
Douglass, W. A., on savings institutions, 284.  
Dredges, *ill.* 146.  
Dredging, deep-sea, 54, *ill.* 146, 222.  
Drift, remains of, 73.  
Drumlins, *ill.* 418.  
Dudley, P. H., on track-inspection car, 348; wood-sections, 45.  
DUDLEY, W. L. Effect of crystallization on sediment, *ill.* 484.  
Dising, on organic evolution, 532.  
Dumas, bust of, 481.  
Dun, W. A., on Ohio floods, 44.  
Dury, C., on Micropterus, 263.  
Dutton, C. E., on glaciers, 154.  
Duveyrier, H., on Mussulman propaganda, 457.  
Dwarf race of men, 410.  
Dyke, trap, 328.  
Dynamo-electric machines, 314; recent progress in, 520; government of, 298.  
Earth, face of, *ill.* 535; and sun-spots, *ill.* 564; currents, 314.  
Earthquake of Aug. 10, 140, 144, 158; of Sept. 19, 332; of 1881, in India, 27; observation in United States, 520; systematic, 352, 368; Ohio, 302; phenomena, observation of, 334.  
Earthquakes in the United States and Canada, 569; measurement of, *ill.* 516.  
Earthworm, gigantic, 426.  
EATON, John. Scientific methods and scientific knowledge in common affairs, 246.  
Echinoderms, 261; dredged by the *Talisman*, *ill.* 102.  
Eclipses, 1885, *charts*, 578.  
Ecliptic, obliquity of, 295.  
Economic science and statistics section of American association, 121.  
EDDY, H. T. College mathematics, 230; radiant heat, *ill.* 3.  
Edison lamp, radiant matter in, 374.  
Edison's three-wire system of distribution, *ill.* 477, 524.  
Education and the masses, 53; in geography, 281; higher, in Germany, 502; industrial, 537; at international health exhibition, 333; technical, 425; workshop in, 395.  
Educational convention, 112; methods in laboratory practice, 322.  
Egg-cocoons of *Lycosa*, 24.  
Eissler's Modern high explosives, reviewed, 278.  
Electric candle, 267; isolation, 350; light, 463; circuits, *ill.* 123; economy of, 324; incandescent, for vessels, 561; tramway, Portrush, 324.

 Massachusetts topographical map, 3.  
 Mastodon, 112.  
 Mathematics, college, 230.  
 Meat, supply of, 286.  
 Mechanical engineers, training for, 323; science, relation of, to other sciences, 215; section of American association, 2, 187.  
 Mechanics, applied, 406.  
 Medals of Royal society, 561.  
 Mediaeval history, 313.  
 Medical congress at Copenhagen, 75, 300; geography, 220.  
 Medina's Aborigines of Chile, reviewed, 423.  
 Medulla oblongata, 341.  
 MEEHAN, J. T. Minerals near Philadelphia, 368.  
 Meehan, T., on opposite leaves in *Salix nigra*, 24.  
 Melkola, on jelly-fish, 155.  
 Meng-leang, 159.  
 Mental evolution in animals, 16.  
 Merchantmen, defence of, 505.  
 Meridian circle, Harvard college, 293; conference, 376, 406, 421; work of, 414; of longitude, zero, 32.  
 Meridians of longitude in South America, 561.  
 MERRIAM, C. Hart. The coming of the robin and other early birds, 571; the hood of the hooded seal, *Cystophora cristata*, *ill.* 514; the star-nosed mole amphibious, 429.  
 Merriam, C. H., on bird-migration, 374; Mammals of the Adirondacks, reviewed, 445.  
 MERRILL, G. P. Hornblende andesite from the new Bogosloff volcano, 524.  
 Merriman, M., on doubtful observations, 292; Method of least squares, reviewed, 39.  
 Metallic circuits in cables, 52.  
 Metallurgy of primitive nations, 21.  
 Metals, diffusion of, 253; spectral lines of, 254.  
 Meteor, fall of, near Odessa, 188.  
 Meteoric research, medal for, 49.  
 Meteorological observatory, 92; society, New-England, 30, 424.  
 Meteorology, bibliography of, 449.  
 Metre, relation of yard to, 296.  
 Metric system, use of, 30; value of, 537.  
 Metz's Modern palmistry, reviewed, 558.  
 Mexican railway, 12.  
 Micaria limnicunae, 23.  
 Michales, O. E., on heavy-guns, 12.  
 Michelson, on velocity of light, 254.  
 Micro-organisms, value of investigations on, 48.  
 Micropterus dolemieu, 263; nigricans, 263.  
 Microscope for class-room demonstration, *ill.* 540.  
 Microscopical journals, new, 365; science, 244; structure of rocks, 505; technique, 350.  
 Milk, composition of, 322; effect of fermentation on, 405.  
 Minerals near Philadelphia, 368.  
 Minnesota Ojibwas, implements of, *ill.* 527.  
 MINOR, C. S. Death and individuality, 398; the organization of an international scientific association, 80.  
 Minot, C. S., on biological problems, 339; growth and death, 342; skin of insects, 341.  
 Mitchell, H., on Delaware estuary, 329.  
 Mitegall, 339.  
 Mole, star-nosed, amphibious, 429.  
 Molecular dynamics, 437; volumes, 256.  
 Mollusca, classification of, 143, 334, 351; new type of, 50.  
 Monotremata, 261.  
 Montigny on scintillation of stars, 267.  
 Monuments, American contributions to, 483.  
 Moon's latitude, 294; surface, temperature of, 396.  
 MORSE, E. S. Korean curios, 270; man in the tertiary, 244.  
 Morse, E. S., on Korean customs, 345.  
 MOSELEY, H. N. The physiology of deep-sea life, 209.  
 Moseley, H. N., on *Utricularia vulgaris*, 262.  
 Mosses of North America, 446.  
 Mounds, emblematic, 343; Florida, 344; Indiana, 344; Ohio, 151, 317.  
 Mount Koraima, 280.  
 Mount St. Augustin, volcanic outburst on, 538.  
 Muir, W. K., on single-track railways, 288.  
 Muirhead, H., on mackerel sky, 253.  
 Mullall, M. G., on debts of nations, 285.  
 MUNROE, C. E. Recent observations on explosive agents, 13.  
 Munroe, C. E., on petroleum oils, 321.  
 Muscles of crabs, strength of, *ill.* 521.  
 Muskrat with round tail, 34.  
 Mussulman propaganda, 457.  
 Mythology of Wintuns, 345.  
 Names and occupations, correspondence between, 33.  
 Naples zoological station, American table at, 74.  
 National academy of sciences and government, relations of, 428; October meeting of, 396; papers read before, 408; board of health, 427; conference of electricians, 127; price, 349.  
 Natural history, American, 536; textbooks, 395.  
 Naturalist, rambles of, 380.  
 Nautical almanac for 1884, 20.  
 Naval war college, 424.  
 Nebulae, 294.  
 NELSON, E. T. The Ohio earthquake, 302; swarming insects, 111; a viviparous pumpkin, 470.  
 Netschilluk Innuit, *ill.* 543.  
 Neubauer, A., on races of Jews, 319.  
 NEWCOMB, S. Can ghosts be investigated, 525; psychic force, 372; psychical research, 509.  
 Newcomb, S., on value of obliquity of ecliptic, 295.  
 New England, Algonquin legends of, 499; meteorological society, 30, 424; orchids 498.  
 New-Jersey flora, 358; geological survey, 326.  
 Newport, old stone mill at, *ill.* 512.  
 Newton's theory of atmospheric refraction, 295.  
 New-York agricultural station, annual report of, reviewed, 519; gypsum deposits, 325; state survey, termination of, 2.  
 New Zealand, glacial period in, 426.  
 Niagara water-power as generator of electricity, 12.  
 Nicaragua route, 328.  
 Nicol, W. W. J., on theory of solution, 256.  
 Nile, navigation of, *map*, 456.  
 Nipher, F. E., on electrical transmission of energy, 315.  
 Nitrogen, assimilation of, by plants, 322.  
 Noctuidae, structural modifications of, 44.

- Nomenclature, development of, 109; trinomial, 123.
- Nordenskiöld's book of his explorations, 366.
- North America, birds of, 86; connection of, with Greenland, 283; mosses of, 446; races of, 345; synoptical flora of, 308; vegetation of, 261.
- North-Atlantic currents, *ill.* 415.
- North pole, prize offered for nearest approach to, 124.
- North-west, late news from, 474.
- Nova-Scotian coal-field, 258.
- Novaia Zemlia, result of meteorological station in, 188.
